Casino games with play money can be played without registration in the practice mode. For casino games with real money, a valid registration is required.

### **II. CONVERTING OF CHIPS IN THE CASINO**

1. In order to be able to play in the real money area, the user must buy chips in EUR currency from his/her account. 2. The same procedure is used with the selling/converting back of EUR playing chips into the account currency: The user enters the number of chips, which he/she would like to sell, in order to have his/her account credited. By clicking the "sell" button, the amount is converted back, as requested, on the basis of the official currency mid-rate. The user is then informed that the transaction has been carried out.

1. Each user can participate in all games that are offered by myBet.com in the practice mode. In this area, the user has the opportunity to use the play money credit provided to him/her as a bet. 3. If this amount is not available to the user, he/she will receive an error message with the request to correct his/her bet to the amount corresponding with the chip/play money credit.
